

# External Service Provider and Geolocation Policy

1Path does not transfer data provided by Customers to external parties (contractors, vendors, or service providers) unless those external parties provide the data with the equivalent level of protection that 1Path provides. To ensure the external parties provide the appropriate level of protection, 1Path conducts regular due diligence through internal policies and procedures.

As a company operating primarily within North America, 1Path will only store Client data in Delivery Centers located in North America and Europe.
